

**ASTER**

## **INDIAN ASTER EXPORTERS**

---

- The marigold is an annual flower that blooms very well. The plants have large, fully double flowers in yellow, gold, and orange colours. The Marigold exporter in India exports huge quantities of flowers each year. Now marigold export from India is considered a great business opportunity for our local vendors and farmers to expand their businesses and enter the international market. The Indian Marigold exporter exports several varieties of these flowers to different parts of the world. The Marigold export has been on a rise due to the great reputation and premium quality of the flowers being exported.

# USES & BENEFITS

- The flowers and leaves of the Aster plant can be eaten fresh or dried. It is said that the Native American people harvested wild aster for a multitude of uses.
- Some varieties in the Aster family were used by Native Americans for external wounds such as sores and swelling.
- Few varieties of the Aster family can also be used to treat skin problems and inflammation.
- In ancient times, Asters were also used to ward off serpents. It is said that when September flowers from the aster were burned, it would keep the snakes away.
