USES & BENEFITS

- Mace has various health and medicinal uses. It is consumed by mouth for diarrhoea, nausea, vomiting, stomach spasms and pain, and intestinal gas.
- Mace may also be useful for treating cancer, kidney disease, increasing menstrual flow and so on.
- Mace can also be applied to the skin to kill the pain. It is used especially for pain caused by achy joints (rheumatism).
- In the food industry, mace is popularly used as a spice and flavouring.
