

Comber Noil

All waste is collected by pneumatic waste collection system and converted into bales. As all preparatory machine used in all th four spinning mills is state of the art, the quality of comber noil is very good.

We are producing world class quality yarn that matches with USTER 5% LEVEL. It is mainly due to best variety of cotton. No doubt we are taking special care of contamination during selection of cotton. For your guidance parameters of Comber Noil are as under :

Quality Parameters Of Noil	
2.5% SL	19.00
50% SL	8.20
UR%	45.24
SFI	24.11
MIC	3.40
TRASH %	0.28

Comber Noil: (Bleached & Unbleached)

We provide one of the finest qualities Comber Noil. Comber Noil is a by-product of the yarn spinning process, produced when cotton is combed in comber machine to remove short fibers. Because of comber noil being trash free, it can be used for a number of purposes like, manufacturing of pharmaceutical and surgical cotton. Besides this comber noil is also be used in yarn production. We can also offer you Bleached Comber Noil. It is ideal for making cotton balls, cotton buds and cotton pads. It is manly used in cosmetic field. It is highly hygiene and therefore is appreciated by our clients.

Flat (Upper Carded Waste)

Cotton flat is also a by-product of the yarn spinning process, produced in first carding machine. This fiber length is usually longer but has higher trash as compared to comber noil.

Products	Length	Micronaire	Strength	Trash
Flat(A)	20-26 mm	3.0-4.0	22+	4-6%
Flat(B)	20-26 mm	3.0-4.0	22+	8-11%
Flat	20-26 mm	3.0-3.5	22+	15%

Dropping (Lower Carding Waste)

Droppings or lower carding waste are high in trash. Cotton dropping is obtained during yarn manufacturing. Its low cost and less fiber content makes it ideal for spinning low count yarn.

Products	Length	Micronaire	Trash
Dropping	15-16 mm	3.0-3.5	25%

Clean Licker-in

Licker-in is also a by-product obtained during yarn manufacturing. Being fiber-rich and low cost, it is valuable in low count yarn spinning.

Products	Length	Micronaire	Trash
Licker-in	19-20 mm	3.0-3.5	16%

Cotton yarn hard waste

We are the leading Cotton Yarn Waste Suppliers in India. We can offer wide range of cotton yarn that is widely acknowledged for its innumerable uses.

Cotton Hard / Cotton Yarn Waste / Cotton Thread Waste	
COUNTS :	20 TO 50's
From Ring Spun Yarn	
MOQ:	25 TONS
QUALITY:	SUPERIOR
DELIVERY:	15 DAYS
